Response Summary:

Summer Co-op Work Term Final Performance Evaluation

This evaluation should be completed by the student's supervisor within the last month of the summer co-op work term. The evaluation is for the student: .

You will have an option to choose whether or not to send a summary of your evaluation directly to the student. The purpose of this evaluation is to provide the Engineering Career Centre with valuable feedback on the student's performance. When responding to questions, please provide the most accurate estimate of how you see the student's development and progress.

Once completed, arrange a time to discuss your evaluation with your student. Please click the 'Download PDF' link to save a copy of the evaluation for yourself.

Q1. Student information

Student name	Ayush Ranjan

Q2. Supervisor information

Supervisor name	Stefan Lyssy
Supervisor job title	VP of Engineering
Organization name	Jamesway Chick Master Incubator Inc.
Supervisor phone number	519-239-8062
Supervisor email address	stefan.lyssy@jamesway.com

Q22. Work term information
Is the following information about 's work term correct?
Start date: May 12, 2025
End date: Aug 22, 2025

- Yes

Q3. Please provide a brief summary of the projects or assignments that the student worked on during the summer co-op work term.

Ayush had the opportunity to work on multiple technical projects and assignments, mechanical design assignments, controls/PLC programming, measurements with visual images, etc.
In addition, he helped with some 3D-printing assignments and troubleshooting of our 3D-printer.
He also applied some hands-on mechanical skills to help us build prototypes for testing at customer sites.
He had to work cross-functionally with multiple departments from engineering to procurement to quality to operations to IT.
One of the key objectives for me was to enable access to multiple sources within our organization helping to solve problems and to promote cross-functional collaboration.
Key projects/assignments/tasks:
Programming of PLC controls for new feature of Jamesway's machine design.
Design assignments in SolidWorks.
Participating in our Engineering Change Management process.
Develop software for optical quality checks (dimensional) to verify deflection of plastic egg trays.
Mechanical assembly of prototypes for testing at customer sites (hands-on).
3D printing assignments of 3D-CAD models for prototyping.
Validation of new electrical harnesses to qualify whether they are built to specifications by third-party supplier.

Q20. Please outline any outstanding contributions the student made during the summer co-op work term (e.g., technical contributions, published papers, conference presentations, patents applied for, or recognition received).

Ayush's performance in form of participation, contributions, collaboration with engineering team members and cross-functional, providing solutions, timely responses, presentations and written summaries and technical skills today is superior.
To be honest, I have never seen such a committed and professional student in my 30 year career before.
Skilled, committed, energetic, personal, motivated, friendly, respectful and caring.
He developed a program for a PLC control for light and water valve controls for a new feature in our machine design launching in 2025.
He needed minimum supervision. He followed the objectives of the solution provided to him.
He spent extra time to learn the programming language and developed a solid solution to be presented to our customers.
He completed the assignment beyond all expectations and in record time.
He created a detailed and structured report/presentation about a quality issue analyzing the deflection of egg trays under load to determine potential quality issues with our customers.
Ayush learned SolidWorks and numerous design features within the CAD application. And he applied the 3D-CAD know-how by printing prototypes with our 3D-printer.
He also took the lead of troubleshooting the 3D-printer and working with the third party supplier to fix the issues to make sure the printers works reliably.
Ayush was in the office every day, even him taking public transportation every day.
It was an amazing adventure working with Ayush!
Thank you Ayush!
Stefan

Considering typical co-op professional development expectations, please assess the student's skills and job performance to date on a scale from 1 (poor) to 5 (outstanding). If you were not able to observe the student demonstrate a specific skill or their performance in a specific area, select 'no basis to judge.'

Q5. Technical skills

Correctly applies technical knowledge to practice	Outstanding (5)
Gathers and evaluates data and information to reach conclusions	Outstanding (5)
Analyzes and solves open-ended technical problems	Outstanding (5)
Designs a product, instrument or tool to meet desired needs	Outstanding (5)
Uses technical tools (e.g., software) and resources	Outstanding (5)

Q6. Communication and teamwork skills

Effectively communicates orally	Outstanding (5)
Effectively communicates in writing	Outstanding (5)
Works collaboratively and respectfully with others	Outstanding (5)
Accepts and applies feedback from others	Outstanding (5)

Q7. Time management and organization skills

Works independently with little supervision	Outstanding (5)
Plans and organizes work	Outstanding (5)
Completes work assignments on time	Outstanding (5)

Q8. Adaptability

Adapts to and navigates workplace environments	Outstanding (5)
Aware of organization goals	Outstanding (5)
Manages job expectations	Outstanding (5)

Q9. Initiative and leadership skills

Asks questions and seeks support from others	Outstanding (5)
Seeks out opportunities to contribute to the organization	Outstanding (5)
Influences and motivates others	Outstanding (5)

Q10. Learning skills

Learns new concepts and ideas	Outstanding (5)
Identifies gaps in knowledge and skills and finds ways to fill these gaps	Outstanding (5)

Q11. Ethics and social responsibility

Makes ethical judgments in complex situations	No basis to judge
Considers the impact of work activities on society	Outstanding (5)

Q12. Job performance

Shows interest in and commitment to work	Outstanding (5)
Produces good quality work with few errors	Outstanding (5)
Produces an appropriate volume of work	Outstanding (5)
Overall job performance	Outstanding (5)

Q13. If you have any comments about the student's skills or job performance, please state them below.

As I mentioned in the previous section of the evaluation, Ayush's performance in form of participation, contributions, collaboration with engineering team members and cross-functional, providing solutions, timely responses, presentations and written summaries and technical skills today is superior.
I truly have never seen such a committed and professional student in my 30 year career before.
Skilled, committed, energetic, personal, motivated, friendly, respectful and caring.
The fact that I received positive feedback (beyond just positive, they were impressed) from multiple engineering colleagues and from cross-functional team members at Jamesway appreciating his participation in tasks and assignments speaks for itself.
I had colleagues approaching me highlighting his technical skills, his communication skills, his problem-solving skills and his highly respectful personality numerous times throughout his term.
Ayush left an amazing impression on me, on us, on Jamesway.
If there is any opportunity to bring him back for another term or even hire him after graduation we would not hesitate.
I am so thankful having had the opportunity to offer the work term to him and to work with him.
Ayush is an exceptional student. I have no doubts that he will have a successful and exciting career in front of him. He is just starting!
THANK YOU!
Stefan

Q14. Please list the student's major strengths.

Technical skill set today, drive to learn beyond all expectations, highly professional communication skills, and collaboration cross-functionally not just limited to engineering.

Q15. Please list the student's major areas for improvement and provide recommendations on how they can improve.

Truly I cannot identify any area of improvement. Ayush got it all today. Still being young and just taking off in his career.
The only one advise I had and I told him is to find a work and life balance throughout his career in the years to come.
When Ayush sees or identifies a problem or a challenge he will go beyond all expectations knowing he will work long days and even throughout the nights to solve the problem and provide a solution as quickly as possible.
Yes, when you are young and full of beans this is ok. But in the years to come please find a balance to stay healthy mentally and physically to have a long career and a long life ahead of you.
Please balance work with hobbies and social activities!
Thank you for the opportunity to provide feedback!
Stefan

Q21. Would you support the return of this student to your organization upon graduation?

- Yes

Q22. If you have any comments, please state them below.

Ayush is an exceptional student. A one of a kind. I am hoping the University of Toronto does recognize that they have a special student.
I wish him all the Best in his career to come. I want him to stay connected to me wanting to help him more to grow within his career, especially at the beginning when he takes off in the years to come.
It was a true pleasure working with Ayush! A rare experience for many of us.
Stefan

Q21. Would you like to be contacted about opportunities to engage with our students and career development programming within the PEY Co-op program?

- Yes

Q23. Would you like a summary of your evaluation to be sent directly to the student?

- Yes
