Education

The University of Toronto **Faculty of Applied Science + Co-Op (Summer 2027)** May 2028 (Expected)
BASc in Computer Engineering *Minor in Engineering Business* *Certificate in AI Engineering* *Toronto, Ontario*

- **Honors & Awards:** Dean's Award & International Scholar Award (Scholarship) Recipient at The University of Toronto
- **Technical Coursework:** Data Structures & Algorithms, Operating Systems, Computer Organization, Computer Security, Fundamentals of Deep Learning (I), AI (I) & ML (I), Digital Electronics, Hardware Design & Communication
- **Business Coursework:** People Management & Organizational Behavior, Markets & Competitive Strategy, Effective Leadership Foundations, Accounting & Finance Fundamentals, Engineering Economic Analysis & Entrepreneurship

Summary of Qualifications

Computer Engineering and Engineering Business student with experience in full-stack software engineering, research & development engineering and cross-functional engineering & people management. Interested in Technical Product / Engineering Management (TPM / EM) internships that combine problem-solving with cross-functional communication.

Technical Skills: Python, SQL, HTML, CSS, JS, C, C++, SolidWorks, AutoCAD, Schneider Electric / Unitronics (HMI / PLC)
Applied Concepts: Git / GitHub, DSA, Databases, API Design, LLMs, ERP Systems, Cloud Computing, SDLC, CI / CD
Data & Management: Microsoft Word, Excel, PowerPoint, Power BI, MATLAB, R, Pandas, NumPy, Confluence, Jira, ADP

Experience

Mozilla Firefox **mozilla.org** May 2026 – Apr 2027 (Expected)
Software Engineering Intern (Localization Team) *Toronto, Ontario*

- Designed and shipped a dark mode feature for Pontoon, Mozilla's localization platform serving 1,000+ users, introducing independent editor themes for light, dark, and system appearance.
  https://blog.mozilla.org/l10n/2026/07/06/giving-pontoons-editor-its-own-theme/
- Contributed 2,000+ lines of code across Python, SQL, Django, JavaScript, React, HTML, and CSS, submitting multiple pull requests spanning frontend, backend and database functionality.
  https://github.com/mozilla/pontoon/pulls?q=author%3Aayshushus

Healthlytics AI **healthlytics.ai** Sep 2025 – Dec 2025
Technical Product Management Intern (Founding Team) *Toronto, Ontario*

- Bridged engineering and management for an AI-powered virtual physician product by discussing technical feasibility with 3+ engineers and communicating implementation considerations to upper management (CEO/CTO).
- Presented product concepts and demonstrations to 20+ clients, gathering feedback and communicating their needs to the team to inform product development in all stages of the SDLC.
- Contributed to the design of AI-assisted patient intake pipelines using EchoMimic-driven physician avatars, embedding generation and 6GB+ vector storage to support 10+ preliminary screenings and physician handoffs.

Jamesway ChickMaster Incubator Inc. **jamesway.com** May 2025 – Aug 2025
Research & Development Engineering Intern (Innovation Team) *Cambridge, Ontario*

- Researched and developed a client-facing HMI integrating PLC-controlled components for a poultry early-feeding system, enabling software-based control of water flow across 6+ automated feeding operations.
- Collaborated across 4 engineering disciplines to develop poultry incubation systems, coordinating electrical, firmware, software, HMI, PLC and manufacturing requirements across the hardware-software stack.
- Researched and developed a retrieval-augmented generation (RAG) application leveraging semantic retrieval across 500K+ technical knowledge records to facilitate AI-assisted engineering documentation discovery.

Spaces & Experiences at UofT **spacesandexperiences.utoronto.ca** Sep 2024 – Apr 2025
Engineering Programming Ambassador (Chestnut Residence) *Toronto, Ontario*

- Planned and budgeted 7+ engineering events for 200+ engineering undergraduate students, coordinating activities, group participation, logistics and prizes.
- Developed a reusable QR code generator and URL shortener using JavaScript, HTML, and CSS for 100+ university event posters pointing to 50+ event links and forms.
- Organized 2 residence-wide dinners connecting 10+ engineering professors with 500+ engineering undergraduate students, coordinating event planning and logistics.
