Education

The University of Toronto **Faculty of Applied Science + Co-Op (Summer 2027)** May 2028 (Expected)

BASc in Computer Engineering *Minor in Engineering Business* *Certificate in AI Engineering* *Toronto, Ontario*

- **Honors & Awards:** Dean's Award & International Scholar Award (Scholarship) Recipient at The University of Toronto
- **Technical Coursework:** Data Structures & Algorithms, Operating Systems, Computer Organization, Computer Security, Fundamentals of Deep Learning (I), AI (I) & ML (I), Digital Electronics, Hardware Design & Communication
- **Business Coursework:** People Management & Organizational Behavior, Markets & Competitive Strategy, Effective Leadership Foundations, Accounting & Finance Fundamentals, Engineering Economic Analysis & Entrepreneurship

Summary of Qualifications

Computer Engineering, AI Engineering & Engineering Business student with extensive experience in Artificial Intelligence, Full-Stack Software Engineering, R&D Engineering, Cross-Functional Engineering, Engineering Leadership & People Management. Interested in Management internships that combine problem-solving with cross-functional communication.

Technical Skills: Python, SQL, HTML, CSS, JS, C, C++, SolidWorks, AutoCAD, Schneider Electric / Unitronics (HMI / PLC)
Applied Concepts: Git / GitHub, DSA, Databases, API Design, LLMs, ERP Systems, Cloud Computing, SDLC, CI / CD
Data & Management: Microsoft Word, Excel, PowerPoint, Power BI, MATLAB, R, Pandas, NumPy, Confluence, Jira, ADP

Experience

Mozilla Firefox May 2026 – Apr 2027 (Expected)

Software Engineering Intern (Localization Team) *Toronto, Ontario (Remote)*

- Designed & shipped custom themes for Pontoon, Mozilla's localization platform, directly impacting 10K+ users & localizing for 100M+ users. Worked with 5+ senior engineers & 4+ TPMs to ship themes fully meeting user needs. Mozilla Blogpost on My Work: https://blog.mozilla.org/l10n/2026/07/06/giving-pontoons-editor-its-own-theme/
- Authored 25+ pull requests (5K+ LOC) across Python/Django, React/TypeScript/JavaScript, GraphQL API, SQL database & HTML/CSS layers, resolving bugs & shipping cross-stack improvements with approvals from 50+ TPMs. Open-Source Contributions Public on GitHub: https://github.com/mozilla/pontoon/pulls?q=author%3Aayshushus

Healthlytics AI Sep 2025 – Dec 2025

Technical Product Managing Intern (Founding Team) *Toronto, Ontario (Remote)*

- Bridged engineering & management for an AI-powered virtual physician product by discussing technical feasibility with 3+ remote engineers, communicating implementation summaries to upper management (CEO/CTO/CFO).
- Presented product concepts & demonstrations to 20+ clients, gathering feedback & communicating needs in all stages of the SDLC. Facilitated 4+ customer workshops & 50+ consumer product questions/clarifications.
- Contributed to the design & architecture of agentic AI-assisted patient intake pipelines using EchoMimic-driven physician avatars, prompt engineering, RAG, embedding generation & 6GB+ vector storage (noted 100+ prelims).

Jamesway ChickMaster Incubator Inc. May 2025 – Aug 2025

R&D Product Engineering Intern (Innovation Team) *Cambridge, Ontario (Hybrid)*

- Only Intern to receive a Perfect Score & Fully Outstanding VP Evaluation: https://www.ayshush.us/jcmi_eval.pdf
- Only intern to represent Jamesway's Engineering Management in 3+ technical workshops with 1000+ attendees.
- Researched & developed 2 HMIs integrating 7+ PLC-controlled components for poultry early-feeding systems, enabling software-based flow control of 16+ automated feeding operations (installed for 2 incubator clients).
- Collaborated across 4+ engineering departments with 22+ team members to develop a RAG chatbot to facilitate AI-assisted technical documentation for 2K+ users, leveraging semantic retrieval across 500K+ knowledge records.

Spaces & Experiences at UofT Sep 2024 – Apr 2025

Engineering Programming Ambassador (Chestnut) *Toronto, Ontario (Hybrid)*

- Led, planned (end-to-end) & budgeted 12+ engineering events for 1K+ engineering undergraduate students living at Chestnut Residence. Coordinated activities, group participation, & logistics for technical & non-technical groups.
- Interacted with 30+ Residence Life Office (RLO) staff members & conducted 4+ knowledge sessions to spearhead & design (end-to-end) a fully reusable QR code generator using HTML, CSS, Python, SQL & JavaScript for 300+ university event posters pointing to 10K+ event links & forms: https://www.ayshush.us/qr_code_handoff.pdf
- Organized 2 residence-wide dinners connecting 10+ engineering professors with 1.5K+ undergraduate students.
