To Ayush Ranjan <ayush.ranjan@mail.utoronto.ca>

Hello,

On March 6, 2025 we had a follow-up conversation about this.

The password for accessing the generator will be chester. Ayush simplified the user experience. It is very streamlined. We will just have to share the password with student staff. Ayush will give a 15 minute presentation to the RLO after exams in April or May to help pass on the knowledge so that everyone knows about the resource and can pass it on to student staff.

He worked 26 hours on this project and will be logging the hours over the rest of his time up to 10 hours/ week. He will log an additional 2 for the project to prepare the presentation to the RLO.

The website is pe.ke. So simple!

Best,
Nik

Subject: Chestnut QR code use of pe.ke

Hello Ayush,

Thanks for meeting today! I am going to re-cap what we spoke about. Please let me know if everything sounds correct to you:

-The QR code generator will be password protected and we will share this with all student staff. There will be a cookie for this so their devices remember the log in after initial log in
-The website is a custom URL shortener and not going through a third party, so it should be relatively safe according to Maher's advice
-We will be paying your (around 10 hours) to develop this for Chestnut and then we will use it for free. If at any point you want us to stop using it or you want to remove the password so it can be general access again, you can just let us know and we will do so.

Best,
NIK ROBERTS-STAHLBRAND, MA
